Welcome to Dubber's Freeware Links page.

There are 2385 links to Freeware websites listed on this page. These linked websites can list Freeware sites, or individual Freeware program links, or programs that are written by individuals who offer them to you for free.

Since you may be on a slow dialup or for some other reason do not want to load this rather large page every time you look for Freeware sites, I have divided this page into several pages listing only one to three letters of Freeware sites. Here are links to them:

[A](#) | [B](#) | [C](#) | [D](#) | [E](#) | [F1](#) | [F2](#) | [G](#) | [H](#) | [I](#) | [J](#) | [K](#) | [L](#) | [M](#) | [N](#) | [O](#) | [P](#) | [Q](#) | [R](#) | [S](#) | [T](#) | [U-V](#) | [W](#) | [X-Y-Z](#)

Below, and at the bottom of this page, are more Alphabetical menus to use for direct access to Freeware sites on this page beginning with each letter of the alphabet. Click on the one you want. At the end of each letter's list of sites is a link to go back to the top of the page. So, if you are looking in the Y section, you can just click to go to the top of the page and, once there, you can click on the C in the letters at the top and go right down to the C section. That's much easier than scrolling up and down.

[A](#) | [B](#) | [C](#) | [D](#) | [E](#) | [F](#) | [G](#) | [H](#) | [I](#) | [J](#) | [K](#) | [L](#) | [M](#) | [N](#) | [O](#) | [P](#) | [Q](#) | [R](#) | [S](#) | [T](#) | [U](#) | [V](#) | [W](#) | [X](#) | [Y](#) | [Z](#)

If you know what you are looking for, just click on "Edit" at the top of your browser and then on "Find" and you can search this page very easily for whatever it is you are looking for.

You can also just scroll down the page and stop at a random place and maybe find something that interests you. Websites that I recommend most are in Caps.

Anyway, gentle reader, this page is here for you. Enjoy.

The links on this page were last checked manually by dubber on December 22rd, 2006. Forty-five links were moved to the Deleted Freeware Links page.
